

The prio holostele benefits & rough cost calculation

New digital event – eye-catcher!

The chic prio holostele creates new opportunities for your event! Whether yours is a company merger, management conference or product presentation, a 3D hologram makes products, objects and animated sequences with text three-dimensional and allows them to float freely in space. The 3D hologram is a true-to-life image and visible from all sides. This frees you from the classic stage design and encourages interactivity! Want an example? Toss a real match into the prio holostele and impress your guests with digital fireworks!

media production € 10.000,00 depending on concept, effort
and number of media files
